Brigade meadows 560082 | +91 7676484943 | ripal.godhani@gmail.com |

Software engineer

- Developed and launched multiple websites, including a plant-based website created from scratch, enhancing user engagement and traffic.
- Built a heart attack prediction app using machine learning models during a hackathon, demonstrating innovative problem-solving skills and teamwork.
- Contributed to numerous web development projects, utilizing automation to streamline processes and improve efficiency.
- Designed and implemented user-friendly GUI applications, improving user experience and accessibility.
- Interned at Vinayaka Company, where I applied web development skills to real-world projects, contributing to the company's digital presence.

PROJECTS AND INTERNSHIPS

Vinayaka perfumery

During my internship at Vinayaka Company, I integrated WhatsApp for automated order confirmations, real-time status alerts, and delivery updates. This enhanced customer communication, improved transparency, and reduced the customer service team's workload, streamlining overall operations.

Tender Garden

I did the creation of a plant-based website from scratch. This comprehensive project included integrating a payment gateway, setting up AWS hosting, implementing a database for inventory management, and developing a secure login system. This initiative not only enhanced online presence but also optimized user experience and operational efficiency.

ACCOMPLISHMENTS

- Developed Efficient CI/ CD Pipelines and used DevOps Methodologies to speed up the deployment process.
- Built a full-fledged plant-based website from the ground up, sharpening my web development and project management skills.
- Designed a heart attack prediction app with machine learning models in hackathon, reflecting my knowledge to bring new technologies into actionable application.
- Participated in various web projects for which automated methodologies were used to be more efficient and not have manual labor.
- Web Development Intern, Vinayaka Company: Worked as an intern to support the company with digital initiatives and played a crucial role in improving their online presence using my web development

EDUCATION

November 2022 to November 2026

Bachelor of computer science and technology

- Dayananda Sagar University

SKILLS

- Python
- Web development
- Automation
- AWS
- React
- JavaScript
- DevOps
- Databases
- Node.js
- Docker
